## JUNE 2026 NEWSLETTER

The month of June celebrates the following events: Aquarium, Pride, Summer solstice, Fresh Fruit and Vegetables, and reviewing and identifying Letters Vv, Ww, Xx, and Zz.

The first week recognizes Aquarium month, what types of sea life live in the ocean? Have you visited an Aquarium? What did you see? Why is it important to take care of our oceans?

Pride celebrates the LGBTQ community and commemorates the struggle to gain equality and overcome prejudices. The second full week we are making projects such as a Pride flag and a rainbow which represent diversity and unity. We are also reviewing and identifying Letter Ww.

Summer Solstice is June 21st, what types of activities do we enjoy in this season? Outside activities: baseball, soccer, kite flying, swimming, boating, camping, picnics, etc...We also change our eating choices in the Summer: BBQ meats, seafood, veggies, ice cream, salads, and cold drinks. What are your favorite summer dishes?

We transition next into Fresh Fruits and Vegetables, what types do you like? Why are they nutritionally important? What is the difference between Fruits and Vegetables? Our simple rule to help the children understand the difference : Fruits have a seed inside and Vegetables do not. The fruit is the mature ovary of a flowering plant and a vegetable is the edible plant part (leaves, stalks, roots, bulbs, and flowers).

### **REMINDERS:**

We are **CLOSED** for Juneteenth, which is Friday the 19th.
